CS 193 - Project 9 Matrix

Answer with at least 3 features in each section

	Urgent	Not Urgent
Important	**Do - (Your MVP)** - Setup terminal interface - Ability to put out bids or sells - Matching engine for orders - Trade log written to a file.	**Schedule - (For V2.0+)** - Automated traders with randomized orders - Market making both that quotes both ends of the trade - Further analytics of trades
Not Important	- Make the terminal look good - Using matplotlib for charts - Csv file integration, handing that to some python library	**Delete - (Cut it)** - Website or GUI - Real market data integration - User accounts and logins
